

# INSPECTION AND EXPEDITING

## QUALITY SURVEILLANCE AND INSPECTION SERVICES

Since our inception in 1988, Delta Energy Services has been recognized as a reputable company involved with supply of high quality Inspection Services to many of the worlds recognized operators and contractors. We are able to offer our clients a complete range of Inspection & Expediting Services across Scandinavia, UK, Europe and other international locations, providing experienced personnel for either single or regular visits plus the option of continuous cover for the duration of your project.

In the 24/7 world of Inspection, Delta Energy Services' Inspection Services are fast, flexible, cost-effective, and completely tailored to meet individual needs of you, our client. Operating as your 'eyes' and 'ears' we work to reduce a multitude of potential risks faced by customers, such as: non-conformity to contractual requirements, on-site production variations, revised specifications, sub-standard quality & materials, delays in manufacturing schedules and shipping.

We assist your suppliers and manufacturers to implement and reinforce their own quality system and look to drive through improvements in quality, reliability and cost efficiency. With Delta Energy Services' support, conformity to specifications are monitored independently and any required corrective actions are identified and followed up locally on-site.

Delta Energy Services has an extensive network of strategically located field inspectors ready to assist and support your regional quality needs. Delta Energy Services continues to build its reputation on the level of personnel, the speed & flexibility of our response and the wide scope of quality services we can provide.
